Business Hub

Managed Security Platform for Partners

Avast Business Hub is an integrated, cloud-based security platform that allows MSPs and IT service providers to manage Avast Small Business Solutions deployed in their customers' networks. It provides real-time visibility of threats, comprehensive reporting, and management capabilities, all in a single console.

Deploy unified, layered cybersecurity services

Deploy, configure, and maintain a range of Avast Business security services from a single cloud-based platform to help protect your customers' data, endpoints, applications, and networks from malware and other cyberthreats.

Monitor threats from a single dashboard

Configure notifications based on specific device actions and monitor from a centralized dashboard for full transparency into individual device issues as well as threats that might be spreading among connected devices.

Connect securely to any managed device

Connect securely to managed devices and remotely resolve issues, perform tasks, reboot computers, transfer files, and chat with users to gather the necessary context of the issue.

Multi-tenant Capabilities

Manage multiple customer environments or sites from one place and streamline the responsibilities across a larger team.
Avast Business

Features

Single Dashboard
View all alerts at a glance, address issues, and get the insight you need to make informed security decisions and stop threats that might be spreading among managed devices. Add Avast Business services and quickly take action to help increase uptime, stability, and security.

Device and Policy Management
Manage security for Windows and Mac devices with the Business Hub agent using policy templates that can be easily adjusted to fit your customer's needs. Administrators can configure global policies in minutes and assign it to all sites or customers - saving them time and resources. Policy changes will automatically configure themselves on the agent-controlled devices in real-time, requiring less maintenance and making it easier to scale business operations.

Import/Export of Policies
Export or import policy configurations to the management console for backup purposes or transferring them between consoles. The exported file is encrypted and password-protected to prevent unauthorized access to security configurations and passwords stored within the policy.

Comprehensive Reporting
Generate and schedule easy-to-read, detailed activity reports with a few clicks. View reports that include blocked threats, task lists, protected devices, patch statuses, and more.

User Management
To streamline collaboration, you can create multiple Business Hub users. Set user rights to enable full management of endpoints or restrict them to viewing dashboards and reports within a selected section of the console.

Trials and Subscriptions
Easily manage trials and subscriptions for all customers, unleashing new revenue possibilities.

Alerts & Notifications
Configure alerts for important issues that require your attention, and immediately send email notifications to affected parties, enhancing reaction time and minimizing exposure. Alerts and email notifications also include outdated antivirus applications, extended device inactivity, and other device updates.

Real-time Commands
Instantly apply remote commands across managed devices like scans, restarts, and more. Run commands automatically based on policy settings.

Network Discovery with remote deployment
Discover all devices connected to your customers' networks you manage and remotely deploy Avast Business security services to endpoints that require protection.

Flexible Billing
The "pay-as-you-go" helps direct partners consume Avast Business solutions in the way that best aligns with how they transact with their end customers.

Business API Gateway
Speed up your operations with APIs to integrate our online management console with your external systems like RMM software or SIEM.

Avast Business

Solutions & Services

Avast Essential Business Security

Avast Essential Business Security helps deliver device security for small businesses that want remote visibility and centrally controlled protection against viruses, phishing, ransomware, and advanced cyberattacks.

Avast Premium Business Security

Avast Premium Business Security combines our next-gen antivirus with VPN and USB control to help your employees and their devices stay more private and safer online, as well as offline.
